

In the Dark

Don't ever be afraid of the dark. Did you know that we grow in the dark I am not talking about the dark as we know it for example at night time dark, no I am talking about in those dark times in our lives. The times when we are afraid, times when we feel lonely, times when we are wondering where do we fit into life or what is our life's purpose?

We all at some point in our life feel and know of these things and do you know what, God sees us and He hears our cry. We may not see anything happening right now, but He really does care for **you** even though you may think He does not.

For those of you who are gardeners and even for those who are not we all know that when a seed is planted in soil it is in a dark place and throughout its time in the soil it is slowly developing, but it will **not** show its beauty until it is the right time to be seen.

It is the same with us when we are in that dark place, we too are developing. I know at the time of the darkness we may think that it will never end, but that is not true everything is **temporary**.

What I can tell you is keep on **BELIEVING**, keep on PRAISING the God the Maker of Heaven and Earth, and keep on TRUSTING Him continually.
